

Public Lands Committee Goals for 2019

- 1) Stay informed and engaged---to whatever degree possible---on National public lands issues, particularly regarding developments of the management plans and legal challenges to Bears Ears and Grand Staircase/Escalante national monuments.
- 2) Develop a focus on State of Colorado public lands-related conservation issues. Work in closer collaboration with local conservation organizations to make Colorado a national standard bearer for valuing and protecting public lands and public resources such as clean air and clean water. Stay in contact with our State representatives to encourage their support and thank them when they stand up to do so.
- 3) Focus on federal public lands issues specifically affecting the greater Durango area where there is a better political environment for affecting policy.
